

Water Main Improvements

Great Road from Fletcher Road to Concord Road Brooksbie Road from Great Road to #21 Brooksbie Road School Avenue

The Bedford Selectmen recently awarded a contract to W. Walsh Company to continue the cleaning and lining of water mains on sections of Great Road and Brooksbie Road and along School Avenue. The cleaning and lining process scrapes off deposits within the water main and then applies a cement lining on the inside of the pipe to prohibit the future growth of rust.

In order to perform this work, the existing water mains will be taken out of service. Temporary service pipes will be installed above ground. Hydrant connections will be set to maintain emergency fire protection throughout the project.

The project will start in early October. Work hours will be Monday thru Friday, 7:00 am to 3:30 pm, weather dependent. The roads will remain open at all times, although minor delays around the construction site should be expected. The work should be complete by the end of November.

Bedford Water Division personnel will be overseeing this project. Should you have any questions or need additional information, please contact the DPW at (781) 275-7605.
