

## BEDFORD ROAD WORK

May 28 - June 5

The Bedford Department of Public Works has scheduled crack sealing of the following roadways starting Thursday May 28<sup>th</sup> and should be complete by June 2<sup>nd</sup>. Work hours will be 7:00 am to 4:00 pm, weather dependent.

North Road

Great Road – North Road to Bacon Road

Concord Road

Page Road – Old Billerica Road to Lexington town line

The crack sealing process uses a high-pressure line to remove sand and debris in the crevice. A hot (320°F) asphalt-fiber compound is poured in the crack to seal the joint against water intrusion. This work is being performed in advance of the thin overlay (microsurface) scheduled for later this construction season. Bedford Police Details will be on site to direct traffic – please use caution when driving or walking past the equipment.

In addition to the above road work, the easterly driveway and parking area along the tennis and basketball courts at the Bedford High School will be reconstructed starting June 1<sup>st</sup>. The area will be pulverized, regraded and the first course of asphalt paved by June 5<sup>th</sup>. Parking during this work will be available at the Town Hall or behind the Library. Thank you for your cooperation.
